

# PROTECT OUR CARE

## ACA At 10: Impact of the Affordable Care Act in Minnesota

Ten years ago, the Affordable Care Act (ACA) became the law of the land and millions of Americans gained coverage and critical protections as a result. Today, the ACA is more popular than ever and Minnesotans are benefitting every day from the health care law. Meanwhile, the Trump administration and its Republican allies are trying to take those benefits away by fighting the law in Congress and in the courts. It's no surprise that Democrats are [trusted](#) far more than Republicans to continue to protect people's care and lower costs. While Democrats continue to put forth measures to strengthen the ACA, Republicans want to rip away coverage and raise costs across the board.

Here is how the Affordable Care Act is working in Minnesota:

**Approximately 320,252 Minnesotans gained health coverage.** In 2019, 113,552 Minnesotans were [enrolled](#) in comprehensive health coverage through the ACA marketplaces. Additionally, 206,700 people in Minnesota have [coverage](#) through the expanded Medicaid program.

**Insurers can no longer deny or drop coverage because of a pre-existing condition.** Because of the ACA, insurers in the individual market can no longer drop or deny coverage, or charge you more, because of a pre-existing condition. Roughly 2,344,200 Minnesotans [have](#) a pre-existing health condition, including 310,600 Minnesota [children](#), 1,159,000 Minnesota [women](#), and 583,500 Minnesotans between ages 55 and 64.

**Women are no longer charged more than men.** Because of the ACA, insurers can no longer charge women more than men for the same care.

**Ended annual and lifetime limits.** Because of the ACA, insurers can no longer put annual or lifetime limits on the care you receive.

**Insurers can no longer overcharge Minnesotans.** Insurance companies are required to issue rebates when they overcharge Minnesotans. In 2018, insurance companies [returned](#) a total of \$50,249,199 to policyholders in Minnesota.

**Young adults can stay on their parents' plan until age 26.** Because of the ACA, roughly 38,000 in Minnesota have coverage because they can stay on their parents' plans until age 26.

**Free preventive care.** Because of the ACA, health plans must cover preventive services — like flu shots, cancer screenings, contraception, and mammograms — at no cost to consumers. This [includes](#) more than 2,761,583 Minnesotans, most of whom have employer coverage.

**Comprehensive coverage.** Because of the ACA, insurers have to cover what are known as “essential health benefits,” such as maternity care, prescription drugs, and substance abuse and mental health treatment.

# PROTECT OUR CARE

**Tax credits are available to help people afford coverage.** Because of the ACA, most people getting coverage on the marketplace qualify for tax credits to help pay for their premiums. Nearly 61,230 people in Minnesota [receive](#) these tax credits to pay for coverage.

**Helping seniors afford prescription drugs.** Thanks to the ACA, the Medicare prescription drug “donut hole” is closed. From 2010 and 2016, 66,930 Minnesota seniors [saved](#) an average of \$1,077 per beneficiary.

**Children gained coverage.** Almost [three million children](#) nationwide gained coverage thanks to the ACA. If the law is overturned, 47,000 Minnesota children could lose their coverage.
