**Subject: Widespread Support in Arizona for Medicare Negotiations to Lower Drug Prices, Other Key Health Provisions, and the Overall Build Back Better Plan**

**Date: October 13, 2021**

A new Public Policy Polling survey finds strong bipartisan support in Arizona for the key reforms to health care that are part of the Build Back Better Plan that will lower drug costs and insurance premiums, expand Medicare benefits, and increase coverage.

Overwhelming majorities of voters across party lines support giving Medicare the power to negotiate lower prescription drug prices.

- 73% of Arizona voters say they support giving Medicare the power to lower prescription drug prices for all Americans, with 61% saying they strongly support it. Just 17% say they oppose it.
  - This includes support from a majority across party lines, including 90% of Democrats, 65% of independents, and 63% of Republicans.
  - 86% of voters say they think the price of prescription drugs is too high, while just 6% think they are “about right.”
- Opposing Medicare negotiations for drug prices could have political consequences for Arizona’s elected officials. A plurality of voters (45%) say they are less likely to vote for Senator Kyrsten Sinema in the next election if she opposes Medicare having the power to negotiate for lower prescription drug prices. Just 17% say they would be more likely to support Sinema.
- 86% of Arizonans support making sure that Americans do not pay more for the same prescription drugs than what people pay in other countries, while just 6% oppose it. Those in support include 84% of independents and 81% of Republicans.
- Voters reject the drug company argument that giving Medicare the power to negotiate will undermine innovation. 68% of voters agree more that Medicare

should be allowed to negotiate with drug companies to make drugs and medication more affordable to patients, while just 11% agree more with the drug company argument that by letting Medicare dictate prescription drug prices, drug companies' ability to innovate and develop new drugs will be undercut.

Voters are also supportive of the other benefits the Build Back Better plan would offer for health insurance, Medicare and Medicaid:

- 59% of Arizonans support a plan in Congress to lower the health insurance costs for people who buy insurance on their own by expanding tax credits and subsidies. Just 19% overall are opposed. Like many of the previous initiatives, this attracts bipartisan support, including 56% of Republican voters and 52% of independents.
- 79% of voters support using savings from lower drug prices to provide health care benefits for hearing, dental, and vision to seniors on Medicare, and lower insurance premiums for millions more. Supporters include 76% of Republicans and 71% of independents.
- 56% support giving low and moderate income Americans, including seniors, children, and people who do not get insurance at work, the opportunity to get health insurance at little or no cost if their state does not offer coverage under Medicaid. Just 21% are opposed. Supporters include a plurality of independents (48%) and Republicans (41%), with just 28% of each opposed.

A majority (59%) of Arizonans also say they support the overall Build Back Better plan, which would provide paid family and medical leave, expand Medicare coverage for seniors including dental, vision, and hearing coverage, and lower health care costs by allowing Medicare to negotiate lower drug prices. Just 28% are opposed.

Public Policy Polling surveyed 709 Arizona voters on behalf of Protect Our Care from October 8-9, 2021. The margin of error is +/- 3.7%. 52% of interviews for the survey were conducted by text message and 48% by telephone.
