## ***Fact Sheet:*** ***The Republican Default Plan Threatens Wisconsin Veterans' Health Care***

### **The Republican Default Plan Threatens Medical Care for 116,600 Wisconsin Veterans.**

House Republicans' "Default on America" Act [cuts funding](#) for the Veterans Health Administration (VHA) by 22 percent, which would result in 30 million fewer outpatient visits for our nation's veterans all across the country and 81,000 jobs lost across the VHA. That means [116,600 veterans](#) could lose access to outpatient visits in Wisconsin, leaving them unable to get appointments for care like wellness visits, mental health services, and substance disorder treatment. Moreover, top House Republicans [lied about their plans](#) to cut funding for veterans' care and even [threatened](#) to investigate the Department of Veterans Affairs for releasing impact projections.

**Republican Cuts Would Cause Significant Processing Delays For Just Under Half of Wisconsin Veterans' Care.** In addition to reducing access to outpatient visits, cutting funding for the Veterans Health Administration (VHA) would [create a backlog](#) of 134,000 claims nationwide and cut up to \$565 million for critical upgrades to clinics and hospitals, delaying critical care for Wisconsin veterans who rely on aging VHA facilities for life-saving care. [Around 361,000](#) Wisconsinites are veterans—[over 10 percent](#) of whom are people of color—and slightly less than half are enrolled in the VA health system, meaning Wisconsin veterans stand to lose greatly from GOP funding cuts.

**Wisconsin Veterans Risk Losing Medicaid Coverage Under The Republican Default Plan.** Republican paperwork requirements will purposefully make it more difficult for Wisconsin veterans on Medicaid to maintain coverage. Medicaid covers [nearly 1 in 10](#) non-elderly veterans nationwide and plays a [critical role](#) for low-income veterans—39 percent of veterans with Medicaid coverage rely on it as their sole source of coverage.

**The 27 Percent Of Wisconsin Veterans with Disabilities Could Face New Barriers to Health Care.** [Over 27 percent](#) of Wisconsin veterans have disabilities, compared to about 14 percent of Wisconsinites overall. The GOP plan stigmatizes people with disabilities, requiring them to seek a determination from their health care provider that they are "physically or mentally unfit for employment" in order to qualify for an exemption from burdensome paperwork requirements. [54 percent](#) of veterans with Medicaid coverage have a disability, and many Medicaid enrollees with disabilities or serious health conditions aren't enrolled in SSI or SSDI due to narrow constraints and existing bureaucratic obstacles.

# PROTECT OUR CARE

**Wisconsin Veterans Experiencing Homelessness Face Significant Barriers To Maintaining Medicaid Coverage Under the Republican Default Plan.** Veterans are [more likely](#) to face homelessness than the general population, and Republican paperwork requirements will purposefully make it [harder](#) for Wisconsin veterans experiencing homelessness to maintain Medicaid coverage. People experiencing homelessness face [significant barriers](#) to work, from physical and behavioral health conditions to [homelessness itself](#) acting as a barrier to employment. Furthermore, the Republican debt plan [cuts funding](#) for job training and job readiness counseling programs.

**The GOP Plan Rips Health Care Away From Wisconsin Veteran Caregivers.** The GOP plan would cut Medicaid coverage for caregivers of adults with disabilities or chronic or temporary illness, including Wisconsin veterans, who are [more than 1.9 times as likely](#) to have disabilities than the general population. For example, in many cases, if an adult child needed to leave the workforce to care for a veteran parent, they would lose health coverage.
