Trump And MAGA Republicans Want To Put Illinoisans' Lives At Risk

March 23, 2024 marks the 14th anniversary of the Affordable Care Act (ACA). Since President Obama signed the ACA into law in 2010, it has become woven into the fabric of our nation. Thanks to President Biden's efforts to lower the cost of health care, 21.4 million Americans signed up for coverage through the Marketplaces for 2024 – including 398,814 in Illinois. The Inflation Reduction Act has built on the law's strong foundation by lowering premiums for people who buy their own coverage by an average of \$2,400 a year per family. Four out of five people can find a plan that costs \$10 per month or less.

At the same time, <u>more than 23 million people</u> have gained health care coverage through the ACA's Medicaid expansion in 40 states and the District of Columbia, including <u>997,915</u> in Illinois. Right now, <u>over 100 million</u> Americans rely on Medicaid or Marketplace coverage. Medicaid expansion has <u>decreased</u> income inequality, <u>increased</u> access to preventative care, and <u>saved lives</u>.

Millions of Americans depend on the ACA in order to stay healthy and financially secure. It's not just about coverage. It includes a broad range of cost savings and protections that touch nearly every household in the country. For example, if the ACA is repealed, over 100 million Americans with pre-existing conditions could be denied coverage or charged more, 52 million seniors would have to pay more for prescription drugs, and insurance companies would not be required to cover essential services like emergency room care and maternity care, or preventive care such as vaccinations, contraception, and cancer screening.

The ACA has survived countless repeal attempts, and now it's stronger than ever. Yet Republicans still want to destroy the ACA and all of its protections for over 100 million people with pre-existing conditions. Donald Trump has reignited his calls to repeal the ACA, promising to overturn the ACA at least <u>seven times</u> last year. As Trump is escalating his threats to repeal the ACA, Republicans in Congress and their allies are working overtime to dismantle reproductive care, hike premiums, slash Medicare and Medicaid, reverse recent coverage gains, and raise prescription drug costs for the American people.

President Biden has shown what it means to improve health care — he has lowered prescription drug and insurance costs, helped families connect to coverage, and taken on big drug companies and other corporate interests. The MAGA-Republican plan to gut health care will only take us backward and throw the entire health care system into chaos.

If Republicans Get Their Way And Repeal The Affordable Care Act:

- **GONE**: Protections for over <u>5,471,600</u> Illinoisans with pre-existing conditions.
- **GONE**: Medicaid expansion, which covers <u>997,915</u> people in Illinois.
- **GONE**: Quality, affordable coverage for over <u>398,814</u> Illinoisans who signed up for a plan for 2024.
- GONE: Premium tax credits that make premiums affordable for people who
 purchase health care on the Marketplace, saving about 355,000 Illinoisans an
 average of \$542.
- **GONE**: <u>1,884,445</u> seniors in Illinois would have to <u>pay more</u> for prescription drugs because the Medicare 'donut hole' will be reopened.
- **GONE**: 3,686,440 Illinoisans who have coverage through Medicaid and CHIP will face higher costs and disruptions to their medical care.
- **GONE**: More than <u>91,000</u> Illinois adult children will no longer be able to stay on their parents' insurance.
- **GONE**: Insurance companies will be able to charge women more than men.
- GONE: Ban on insurance companies having annual and lifetime caps on coverage.
- GONE: Requirements that insurance companies cover <u>prescription drugs</u> and maternity care.
- GONE: Improved access to care and <u>financial security</u> for families.
- GONE: Key financial support to help <u>rural</u> hospitals stay open.

A Closer Look At How The Affordable Care Act Is Working Across Illinois.

- 1. More Than 398,814 Illinoisans Gained Health Coverage. The start of 2024 saw 398,814 Illinoisans sign up for comprehensive health coverage through ACA Marketplaces.
- 2. Tax Credits Are Available To Help People Afford Coverage. 92 percent of people receiving coverage through the Marketplace qualify for tax credits to help pay for their premiums. Approximately 355,000 Illinoisans are saving an average of \$542 on monthly health insurance premiums. The Inflation Reduction Act builds on the ACA by ensuring all enrollees never pay more than 8.5 percent of their household incomes towards a premium. If these enhanced tax credits are allowed to expire at the end of 2025, premiums will increase by \$1,313 on average for an individual making \$60,000 in Illinois and \$7,522 on average for a family of four making \$125,000 in Illinois.

Table 1: Illinois Marketplace Plan Selections By Congressional District

Congressional District	Marketplace Plan Selections	Plans Subsidized By Tax Credits
IL 01	18,000	16,000
IL 02	17,000	15,000
IL 03	28,000	24,000
IL 04	20,000	18,000
IL 05	29,000	24,000
IL 06	23,000	20,000
IL 07	22,000	19,000
IL 08	33,000	30,000
IL 09	31,000	26,000
IL 10	24,000	21,000
IL 11	26,000	23,000
IL 12	23,000	22,000
IL 13	19,000	17,000
IL 14	24,000	22,000
IL 15	23,000	22,000
IL 16	21,000	19,000
IL 17	18,000	17,000

- 3. Expanded Medicaid Coverage To Thousands Of Illinoisans. The ACA expanded Medicaid for millions of Americans, including a total of 997,915 Illinoisans. Research confirms that Medicaid expansion increases access to care, improves financial security, and leads to better health outcomes.
- 4. Insurers Can No Longer Deny Or Drop Coverage Because Of A Pre-Existing Condition.

 Because of the ACA, insurers in the individual market can no longer drop or deny coverage, or charge Illinoisans more, because of a pre-existing condition. Roughly 5,471,600 Illinoisans have a pre-existing health condition, including 2,693,000 Illinois women, who previously faced unfair price gouging even without a pre-existing condition. Without the ACA, Illinoisans who have contracted COVID-19 would likely be deemed as having a pre-existing condition and be at the mercy of their insurance companies who could refuse to pay for needed care.
- 5. Insurers Can No Longer Overcharge Illinoisans. Insurance companies are required to issue

- rebates when they overcharge Illinoisans. In 2021, insurance companies returned \$2,748,070 to Illinois policymakers an average of \$349 per person in Illinois.
- **6.** Young Adults Can Stay On Their Parents' Plan Until Age 26. Because of the ACA, young adults in Illinois have coverage because they can stay on their parents' plans until age 26.
- 7. Free Preventive Care. Because of the ACA, health plans must cover preventive services like COVID-19 and flu shots, cancer screenings, contraception, and mammograms at no cost to consumers. This <u>includes</u> more than <u>6,526,500</u> Illinoisans as of 2022, who have employer coverage. Importantly, the ACA requires plans to cover all vaccinations recommended by the CDC's Advisory Committee on Immunization Practices (ACIP), <u>including</u> vaccines for COVID-19.
- 8. Comprehensive Coverage. Because of the ACA, insurers have to cover what are known as "essential health benefits," such as maternity care, prescription drugs, and substance and mental health. As it stands, ACA-compliant plans must cover COVID-19 testing, treatment, and hospitalization. Additionally, insurers can no longer put annual or lifetime limits on the care you receive.
- **9. Women Are No Longer Charged More Than Men.** Because of the ACA, insurers can no longer charge women more than men for the same care.
- 10. Improved Access To Care And Financial Security. Between 2010 and 2018, the share of non-elderly adults with a problem paying a medical bill fell by 17 percent, the share who didn't fill a prescription fell by 27 percent, the share who skipped a test or treatment fell by 24 percent, and the share who didn't visit a provider when needing care fell by 19 percent.
